SMALL BUSINESS \$30,000 INSTANT ASSET WRITE-OFF

The write-off threshold of \$30,000 has been extended to 30 June 2019.

If you buy an asset and it costs less than \$30,000, you can immediately deduct the business portion in your tax return.

You are eligible to use simplified depreciation rules and claim the immediate deduction for the business portion of each asset (new or second hand) costing less than \$30,000 if:

- you have a turnover less than \$50 million, and
- the asset was first used or installed ready for use in the income year you are claiming it in.

STRONGARM

MX-V

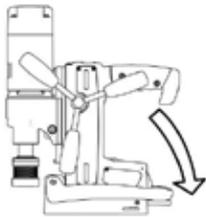

MAGNETIC DRILL PRESS

- **NO POWER NECESSARY**
- **SUPERIOR PERFORMANCE**
- **SMALLER FOOTPRINT**

Cordless Magnetic Drill Press MX-V with switchable magnet technology (MAGRIG), provides superior holding power, weighs less and with a smaller footprint compared to other magnetic drill presses.

Weighing in at only 7 kgs and a footprint of only 190mm x 80mm the MX-V provides **680kg HOLDING POWER** and is effective on thin and thick metal surfaces. The real surprise is it requires **NO ELECTRICITY**.

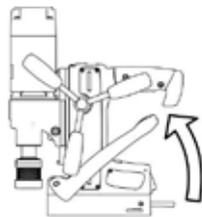

Just flip the switch to stick the rig! The rig comes standard with drill collar for popular 1/2" drills including Metabo, Bosch, Milwaukee and DeWalt corded drills. Additional collar available for the DeWalt 20V Cordless drill.

Place the MAGRIG to the safe & lock the MAGRIG in place.

Turn on the drill & slowly rotate the handles to drill into the safe.

When drilling is complete, simply release the lock & remove the MAGRIG

- The Pro Kit includes: the **MiniRig** and **2 Safe Drill Templates** (for drilling S&G, LaGard and Diebold mechanical locks), **Universal Dial Puller**, plus a fitted **Custom Case** and it all weighs less than 4.5 kg.
- Precise depth control and accuracy makes safe drilling easy and more profitable. Innovative design, quality construction.
- Quick Disconnect design allows you to remove and replace the MiniRig in seconds from mounting options.
- Best of all, it can pay for itself in one or two openings!

Remote Programming Steps

Program Existing Remote to New Remote

1. **If the existing remote is from the OLD MITTO range**
Press the hidden button on the back of the existing remote with a pin. Press and hold the button that operates the receiver (garage door motor) for 2 seconds.
- If the existing remote is the BRCB04**
Press and hold the Buttons 'B1 & B2' (Top 2 buttons on remote) until the LED turns on. Press and hold the button that operates the receiver (garage door motor) for 2 seconds.

2. On the new remote, press and hold the Buttons 'B1 & B2' (Top 2 buttons on remote) until the LED turns on. Press and hold the button you would like to operate the receiver (garage door motor) for 2 seconds.

Program Remote to Receiver without display screen

Note: You must have one existing remote programmed to the receiver (garage door motor).

1. Press 'SW1' button on the receiver board (garage door motor). The LED will start to flash.
2. On your new remote, press and hold the Buttons 'B1 & B2' (Top 2 buttons on remote) until the LED turns on. The receiver's (garage door motor) LED will turn off.
3. Press and hold the remote button you would like to operate the receiver (garage door motor) for 2 seconds. The receiver's (garage door motor) LED will start to flash quickly.
4. Wait 15 seconds and the new remote will be programmed.

Program Remote to Receiver with display screen

Note: You must have one existing remote programmed to the receiver (garage door motor).

1. Press the 'OK' button twice on the receiver (garage door motor). Screen will display PARA.
2. Press the button you would like to use on the receiver (garage door motor). Screen will display the number of the button.
3. Press the button you would like to use on the receiver (garage door motor) again. Screen will display the number of the button.
4. Press the button you would like to use on the receiver (garage door motor) a third time. Screen will display the number of the button.
5. Press the button you would like to use on the receiver (garage door motor) a fourth time. Screen will display the number of the button.
6. Press the button you would like to use on the receiver (garage door motor) a fifth time. Screen will display the number of the button.
7. Press the button you would like to use on the receiver (garage door motor) a sixth time. Screen will display the number of the button.
8. Press the button you would like to use on the receiver (garage door motor) a seventh time. Screen will display the number of the button.
9. Press the button you would like to use on the receiver (garage door motor) an eighth time. Screen will display the number of the button.
10. Press the button you would like to use on the receiver (garage door motor) a ninth time. Screen will display the number of the button.
11. Press the button you would like to use on the receiver (garage door motor) a tenth time. Screen will display the number of the button.
12. Press the button you would like to use on the receiver (garage door motor) an eleventh time. Screen will display the number of the button.
13. Press the button you would like to use on the receiver (garage door motor) a twelfth time. Screen will display the number of the button.
14. Press the button you would like to use on the receiver (garage door motor) a thirteenth time. Screen will display the number of the button.
15. Press the button you would like to use on the receiver (garage door motor) a fourteenth time. Screen will display the number of the button.
16. Press the button you would like to use on the receiver (garage door motor) a fifteenth time. Screen will display the number of the button.
17. Press the button you would like to use on the receiver (garage door motor) a sixteenth time. Screen will display the number of the button.
18. Press the button you would like to use on the receiver (garage door motor) a seventeenth time. Screen will display the number of the button.
19. Press the button you would like to use on the receiver (garage door motor) an eighteenth time. Screen will display the number of the button.
20. Press the button you would like to use on the receiver (garage door motor) a nineteenth time. Screen will display the number of the button.
21. Press the button you would like to use on the receiver (garage door motor) a twentieth time. Screen will display the number of the button.

Whilst every effort has been made to ensure the accuracy of the information supplied herein, we assume no liability for any errors or omissions. Information contained in this document is subject to change without prior notice.

The purpose of the Garage/Gate Remotes booklet is to provide a simple reference guide to assist, identify and select the correct remotes for your customers.

This reference book provides extensive details of a large variety of Garage/Gate remotes which includes:

- Battery compatibility
- Alternative remotes & receivers
- Aftermarket options
- Programming Steps

- Compare your customer's remote in the **LOOKUP TABLES**
- See compatible genuine or aftermarket alternatives
- Find remote information & programming instructions

HOW TO USE THE REFERENCE BOOK

STEP 1 Identify the customer's remote easily via the manufacturer info and/or visual representation.

Remote Programming Steps

Programming New Remote to Receiver

1. Press and hold SW1 (for channel 1) or SW2 (for channel 2) on the receiver board (garage door motor). The LED D1 will start to flash.
2. Press the remote button you would like to use to control the device for two seconds. The LED will start to flash faster.
3. Release the remote button and pause for two seconds. Press the same button again for two seconds. The LED will stay on for a second and then turn off.
4. Release SW button.

Deleting a Single Remote from Receiver

1. Press and hold SW1 (for channel 1) or SW2 (for channel 2) on the receiver board (garage door motor). The LED D1 will start to flash.
2. Press the transmitter button you would like to remove from receiver's memory for two seconds. The LED will start to flash faster.
3. Release the transmitter button and pause for two seconds. Press the same button again for two seconds. The LED will slowly flash two times.
4. Release SW button.

Deleting All Remotes from Receiver

1. Turn the power off to the receiver (garage door motor).
2. Press and hold SW1 button.
3. While holding SW1 turn power on again. After 15 seconds the Coding LED will light up to indicate that the receiver's memory has been cleared.
4. Release SW1. All the stored codes should now be deleted.

Mitsubishi Remote programming explained

The purpose of this month's tech tip is to shed some light on the ongoing issue of Diagnostically programming Mitsubishi remotes. Unfortunately, there is no easy fix for this issue as they remain a tedious task! Although the SGT Tech team have compiled some background information, tips & tricks to ease some of the frustration.

Identification:

A lot of Mitsubishi remote issues are caused by wrong remote selection. We have had multiple reports of different KD remote options working the same vehicles. This sometimes results in more than 1x remote being listed for the same vehicle on the SRS.

If your client has a key available there is a visual identification that can be used to select the right remote. Inside the key shell on the **Black** side (not the **RED** side) of the remote body there will generally be one Large letter.

In Australia this is generally 'A, D, G or Q'. The remotes associated with these on KEYDIY will generally have

"G on shell" in the part number. Also, our testing has confirmed G & Q are the same.

Programming:

The biggest misconception with Mitsubishi remote programming is that the Diagnostic tool (ie; XTOOL) is not allowing the remotes to be programmed. The thing to remember with Mitsubishi remote programming on any diagnostic tool is that the Tool only puts the car into programming mode! The rest of the procedure is a manual procedure.

Tips & Tricks:

1. Apart from the Triton (which is just pressing the Lock button 3x) Most other models have the dreaded chicken dance where timing is everything! We recommend the 6 second method.

6 second method whereas the steps in the colour table are completed in exactly 6 seconds. On Success you will see a KD remote flash an extra time and an original remote flash up to 3x after releasing the Unlock button on the final step.

2. On most Mitsubishi's there is No chime or validation from the vehicle that the remote programming was a success.

If the Remote flashed as mentioned after the last step it is programmed to the vehicle.

Watch the video to see Mitsubishi remote programming in action!

All this info + more can be found in the **SRS XTOOL**
