## TOYOTA - H - KEY KIT Initial Setup & Info

The purpose of this months tech tip is to shed some light on the adaption process of the KTM-H-KIT. Essentially the Key Tool Max is the Base Unit & the 8A Cable & Mini OBD Dongle are additional adapters that require combining to the Key Tool Max.

### STEPS:

After completing the initial Keytool Max setup - creating a Login, setting up Wifi etc. You will 1st need to combine the Mini OBD.

1. Plug the Mini OBD into any 12v OBD port to power it up and make it discoverable to the Key Tool Max. The connection to this device is via Bluetooth.

2. Scroll through the screens on the Keytool Max until you see the dedicated Mini OBD Screen.

3. At the very bottom right select Device & History.

4. Select Combine Device at the very bottom of the page. Follow the steps to combine.

5. Next you will need to combine the 8A Cable with Mini OBD. To do this go to 8A Immo box All keys lost icon on the Mini OBD screen.

6. The 4th pathway down is Combine MINI OBD with 8A all keys lost adaptor. (select this one)

7. This time the 8A adaptor must go direct to the OBD port first with the mini OBD connected in the rear.

Connect the cable side of the 8A adaptor to the OBD Port & the Mini OBD to the Device side of the 8A adaptor.

You are now ready to use the Toyota All keys lost functions.

### Instructions:

Each vehicle has different cable diagrams with different relay locations & fuse locations.

Xhorse have included diagrams for viewing on the Key Tool Max.

To see these go to Mini OBD screen and select 8A immobox all keys lost> 8A Immo box all key lost-OBD make master key.

You should now see a list of vehicle diagrams. Please check & read these thoroughly before commencing programming.

These fusebox images & relay locations may differ to the Australian imported Toyota locations. It is extremely important to understand and input the cables properly into these locations. Apart from Corolla & Rav 4 at this moment we would recommend to send photo's to SGT Support on all other models to ensure everything is connected properly before attempting.

Corolla & Rav4 Australian Manuals are readily available for all KTM-H-KIT customers. Please contact support for a copy of these if you have not received them.
