NEW IMMO SOFTWARE UPDATE FOR IM608PRO

PEUGEOT/CITROEN

Adds Key Learning (Guided) Function for 99 Models including 508, 5008, 2008, C3, C5 and DS6

JAGUAR/LAND ROVER

Adds RFA/KVM Replacement and Key Learning Function for the Models below:

1. Jaguar: XJ (2015-2018), XF (2015-2018) F-TYPE (2015-2018), XE (2015-2018) and F-Pace (2017-2018)
2. Land Rover: Range Rover (2015-2018), Range Rover Evoque (2015-2018), Range Rover Sport (2015-2018), Discovery Sport (2015-2018), Discovery Sport (2015-2018) and Discovery 4 (2015-2018)

GM/HOLDEN

1. Adds Key Learning Function for HOLDEN Models below (In IMMO)

Astra (1995-2003), Barina (1995-1997), Calibra (1995-1996), Caprice (1993-2005), Cascada (2013-2019), Combo (1996-2001), Commodore (1997-2005), Maloo R8 (2002-2004), Monaro (2001-2006), Rodeo (1998-2005), Statesman (1993-2005) and Vectra (1997-2002)

CHRYSLER/DODGE/JEEP

1. CHRYSLER. Adds Key Learning Function and Read Password for Pacifica (2021)
2. DODGE. Adds Key Learning Function and Read Password for RAM (2021)
3. JEEP. Adds Key Learning and Read Password for Compass (2021) with Smart Key

AUTEL®

3 WAYS TO DO MERCEDES

ADD KEY & ALL KEYS LOST

ON VEHICLE- OBD II

Add key

Difficulty Level - ★

Time to Calculate Password: up to 15-mins (approx.)

Emulator insertions: None calculated from original key insertions

PRO - No part removal

All Keys Lost

Difficulty level - ★

Time to calculate password : Most 30 mins some up to 2 hours

Emulator insertions - 1 up to 200

PRO - No part removal

CON - Time to calculate password is sometimes un-feasible

ON VEHICLE- OBD II

ADD KEY

This method is most suited for Add Key. There is no need to remove parts from the vehicle. The Autel can automatically identify the type of system by reading the Vin number from the vehicle & Using the working key to calculate the Password. Once the password has been calculated it is saved and never has to be calculated again. The 1st spare key will take approximately 15-mins the 2nd one will take 1-minute once password is calculated.

ALL KEYS LOST (with APB125)

This method works with most vehicles but only feasible to some. The time to calculate the pincode via IR can vary between models & on some may involve up to 200 key insertions. We recommend checking the time to calculate. Example: up to 30-mins without IR insertion & removal is acceptable. Up to 2-hours with up to 200 insertions & removal is not feasible when there is a quicker way. Calculation times are displayed on the AUTEL unit

ON BENCH- G-BOX 2

Add key

Not Necessary Passcode is calculated easily via OBD II

All Keys Lost

Difficulty level - ★★

Time to calculate password : Most 30-mins on bench. See more info on right

PRO - Faster Password calculation time & no insertions and removals on most models. EIS does not need to be dis-assembled

CON - EIS has to be removed on most vehicles

ON BENCH - G-BOX 2

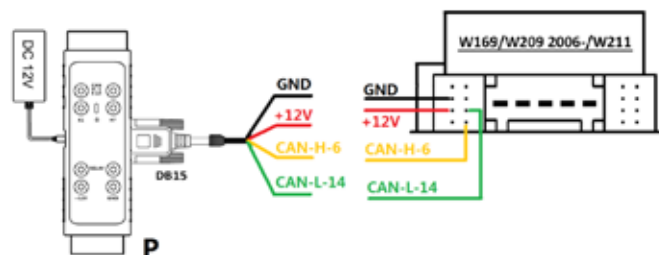

ALL KEYS LOST

This method has some of the greatest advantages for All-Keys-Lost.

1. Faster Password calculation; 8x Faster for W172, W204, W207 4x Faster for W209, W211
2. No repeated insertions and removals of the IR simulator on W164/- 2008, W251/-2008, W164/2009-, W169, W251/2009, W216, W221, W202(K)/W208(K)/W210(K), W203(K)/W463(K)

Some Vehicles can use G-BOX 2 on the vehicle without removing the EIS. For those that require the EIS removed the unit is quite easy to pull out.

Each vehicle has a wiring diagram like below and generally only 4-5 cables need to be pushed in to the rear terminals.

ON VEHICLE- OBD II

Add key

Not Necessary Passcode is calculated easily via OBD II

All Keys Lost

Difficulty level - ★★

Time to calculate password : No calculation time. Password is read directly from EEPROM memory

PRO - No wait times

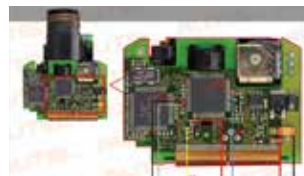

CON - EIS has to be removed and dis-assembled. Wires need to be soldered to PCB

ON BENCH- READ EEPROM MEMORY

ALL KEYS LOST

Whilst this method requires the most skill it is sometimes the quickest way to obtain the password. By directly soldering to the PCB the entire EIS file can be obtained including the password making it in some cases the quickest & most efficient way. This method is also often used when the vehicle or EIS has other underlying communication issues.

The AUTEL unit shows High Quality images for all vehicles to show the solder points like below.

SUBARU SERIES **UPDATE**

KS2

PRODUCT DESCRIPTION

This Mitsubishi 46 Emulator is for generating a functioning emergency start key that can be used to add a regular Proximity Key in an All-Keys-Lost situation. The KS2 is compatible with both the XTOOL-AUS & XT-ELITE-AUS. The KS-2 Supports All-Keys-Lost matching for ID46 Mitsubishi systems only. The KS2 eliminates the need to disassemble the Smart Unit on MITSUBISHI Vehicles. The original car EEPROM data is read from the OBD & Calculated online to produce a working Key file onto the KS-2 using the KC100. The ignition can then be turned ON using KS-2 & a New Smart key can then be added as normal with XTOOL.

PRODUCT SPECIFICATION

Type: XTOOL Key Programmer Adaptor (Additional Hardware)
Compatible with: Art. XTOOL-AUS & Art. XT-ELITE-AUS
Manufacturer Coverage: MITSUBISHI

PITBULL CONTAINER LOCK

Scan to see the product video

'Xtratec' PITBULL CONTAINER LOCK with LOCKTON 55mm High Security Padlock

PRODUCT DESCRIPTION

The PITBULL CONTAINER LOCK is a 3-piece custom designed shipping container lock comprising of 300mm long 8mm thick machined channel, in 3 parts.

When closed, all 3 channel sections are interlocked and secured with a 32 x 20mm solid steel slide bolt.

When interlocked, gaps are protected by 8mm thick shields ensuring there is no access to cut the bolt or jimmy the lock.

Shields cover the gaps between the channel sections and between the channel and bolt.

Art. **PB-CL-55**

The PITBULL Container Lock comes with a 55mm **LOCKTON** padlock:

- 500-55-KD 55mm Padlock
- 55mm Solid brass body (Chrome plated)
- Keyed to differ
- 10mm Boron - Quick change shackle
- Re-Keyable (C4) 6 pin cylinder
- Suitable for restricted key systems
- Can be made from key release to key retain
