# 2019 National Conference & Trade Exhibition

All locksmiths and security industry professionals in Australia and New Zealand are invited to join us at the MLAA's 38th Conference & Trade Expo

## Below message from Peter Lloyd National President Master Locksmiths Association of Australasia

“Please join us in Auckland at the Master Locksmiths Association's 2019 National Conference & Trade Expo, the premier event of the locksmithing industry in Australia and New Zealand. Not only will you have the opportunity to find out about the latest industry trends, great new products and new technology from our wonderful trade partners, you will also have the opportunity to network with your industry friends and colleagues.

We have a full schedule of activities throughout the event, including business, skills and product information sessions. Our Networking Dinner will again take place on the Friday evening allowing delegates to remain at the Trade Expo. The event culminates with our Gala Dinner & Awards night on the Saturday where we will announce the winner of the prestigious 'John Andrew Apprentice of the Year Award' for 2019, proudly sponsored by LSC, Silca and ABUS. We will also announce winners of the MLAA's Best Shop and Best Van awards, sponsored by SG Locks, and the announcement of the Future of Locksmithing prizes sponsored by Lock & Key, Keyline and EVVA.

We will also be inducting two new Life Members and presenting the Albert L. Chantry Award to a local identity who has served our industry with distinction for many years.

While the locksmithing industry is not a large industry, it is full of highly skilled and passionate people who understand the importance of working together. Our industry is changing, and the shift towards electronic security continues to gather pace, however, our Members are embracing this change, and working together to ensure they remain successful in a competitive environment.

I look forward to seeing you in Auckland.”

Hilton Auckland, Princes Wharf, 147 Quay Street,  
Auckland, New Zealand

Friday & Saturday, 18-19 October 2019

## XTOOL - FLEX

The purpose of this months tech tip is to introduce & explain how to setup the XTOOL-FLEX.

the vehicles sub systems. Any purchase of the Flex also comes with Full XTOOL SRS access.

### About the XTOOL- FLEX

Flex is the newest pocket sized OBD Diagnostic tool from XTOOL-AUS.

Designed for Mobile fleets & Expanding workshops looking to put an XTOOL in the hands off more tradesman at an affordable price & those still paying tokens for the most common vehicles.

The Flex powers itself from the vehicles OBD Port so there is no need to charge the tool itself.

The tool also has a built in LED torch to assist in finding the vehicles OBD port & an extension cable to plug into the more difficult spots.

Once the Tool is inserted into the vehicles OBD the Flex will display the vehicles Battery voltage to indicate if a Boost is necessary.

The Flex acts as a passthrough device that is controlled using the Flex application on your phone or tablet.

After completing the Bluetooth setup your phone or tablet will pair with the Flex automatically whenever it is plugged into a vehicle.

Flex comes with the 3x Most popular Immobiliser modules- AUS Holden, AUS Ford & Toyota.

Additionally, More popular modules can be individually purchased as required.

Flex also comes with a fully loaded scan tool for all manufacturers that will Read & Clear fault codes on all of

### XTOOL- FLEX Setup Instructions

1. Search XTOOL Flex in the play store (for Android devices) or App store (IOS devices) and download to your device.
2. Fill in the details on the screen accordingly (Refer to the Certificate of quality you received with your Flex for serial number & activation code)
3. Flex application will ask for permissions- Please Agree.
4. Select the 3 lines in the top left corner and select Update >Update all
5. Plug in the Flex to an OBDII Port to power the device
6. Tap the 3 lines again and select Bluetooth- ( if your Bluetooth is turned OFF- Tap on Bluetooth settings & turn ON)
7. Scan and search- The Bluetooth ID will be your serial number - (DIAG-XXXXX)
8. Pair the device in settings and return to the Flex application.
9. Make sure that the correct Bluetooth device is ticked
10. Navigate the Flex app and try to communicate with the vehicle- Flex should now be paired- Once paired the blue light on the bottom of the Flex will be solid BLUE.
