Tesla Tool - LONG REACH TOOL - Suits Various Tesla Models

PRODUCT DESCRIPTION

The ACCESS TOOLS Art. ID **TT** Long Reach Tesla Tool is a specialty tool designed for opening Tesla vehicles. The tool is supplied with 2 x Art. ID **WS** Wonder Shields to help prevent window damage.

Note: In situations where the vehicle has no power, the electronic locks will not function properly. The manual release lever in front of the window switches can be manipulated to open the door. The manual lever is difficult to access with traditional long reach tools due to the shape of the lever, the physical orientation and angle that it sits at, along with the tight gap that the tool needs to pass through.

PRODUCT SPECIFICATION

- Tool Length: 1.12m
- Compatible with: Model S, Model 3, Model X & Model Y
- Supplied with: 2 x Art. WS Wonder Shields
- MADE IN USA

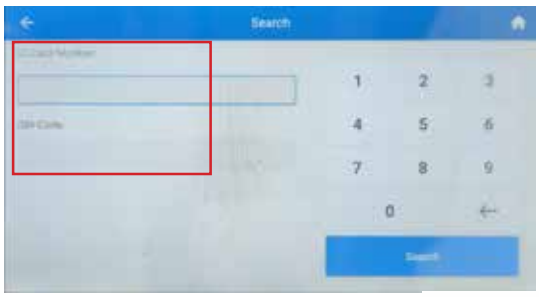
NEW UPDATES

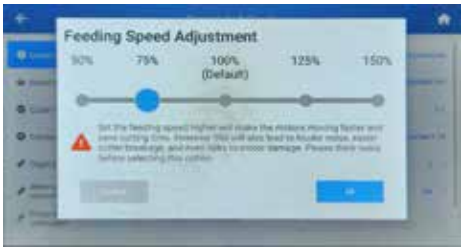
App Version 1.19

IC Card Search



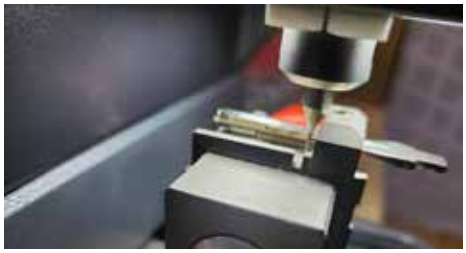
Immediately select the right key cutting card by inputting the IC Card Number. The IC Card can be found on Instacode or on your ORIGINAL LISHI Picks.

Carriage speed adjustment



The Carriage Speed can now be quickly adjusted in the machine calibration menu. This is a vital function given the variety of key material types available in the market today.
For example, being able to slow the carriage down when cutting steel keys is a great improvement.

Detection Assist



There has been improvements made for all key decoding, however the most noticeable function is that Edge keys with a shoulder now measure the shoulder position with the decoding probe to ensure the spacing is accurate - This update means that users no longer have to align 100% with the tip stop.

1. KEY & REMOTE PROGRAMMING

XTOOL Elite IK is an Extremely Powerful & Compact Diagnostic Key & Remote Programming Machine.

The Elite IK is a smaller, more economical alternative to the ELITE with a near equivalent level of power and functionality.

It is capable of programming the majority of Vehicle types from 1996- to current models.

It does not require Tokens to program Keys & Remotes.

Regular updates are available as they are rolled out and the unit is updated via WiFi.

XTOOL supports the following situations:

- Lost Keys
- Additional Keys
- Remote programming
- Pin code reading
- Pin code calculators
- Read + Clear fault codes
- Data recording & Screenshots

2. KEY DUPLICATION & CODE CUTTING

The XTOOL X-CUT is a powerful Code Machine dedicated to cutting Automotive Keys.

It has been developed to cut:

- Edge Keys
- Laser Keys
- Half Keys
- Plastic Keys
- Aluminium Keys
- Crucifix Keys (with purchase of XCUT.007 Key vice)
- Tibbe Keys (with purchase of XCUT.006 Key vice)

The integrated touch screen display enables easy navigation and function selection with its intuitive design.
Key cutting is simplified and streamlined with the options of cutting via Manufacturer, Model or Key Profile with more profiles and vehicles being consistently added via Free Updates.
The software platform also comes with a massive key code database that simplifies the All Keys Lost process.
Trace Duplication function takes the guess work out of making an extra key without having to search for the correct profile and precisely decodes the original key.
Create your own key profiles for the machine via the Customise Key Profile function and create profiles for Edge and Laser keys.
The onboard re-chargeable battery unit has the ability to cut up to 40+ keys without any external power connection.
